MICROPROPAGATION OF KHAYA
SENEGALENSIS AND EUCALYPTUS
CITRIODORA.

By
Mohammed Abd-El-Gawad El-Atriby
(B.Sc. Agric. Mansora University, 1996)

Thesis
SUBMITTED IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR
THE DEGREE OF
Master of Science

In
Horticulture (Floriculture)
Faculty of Agriculture
Suez Canal University

2001
MICROPROPAGATION OF KHAYA SENEGALENSIS AND EUCALYPTUS CITRIODORA.

By
Mohammed Abd-El-Gawad El-Atriby
(B.Sc. Agric. Mansora University, 1996)

Supervised by

Dr. Eid M. Koriesh
Head of Horticulture Department
and Prof. of Floriculture and Medicinal Plants Suez Canal University

Dr. Ahmad M. Abd El-El-Dayim
Prof. And Head of Woody Trees Department, Horticulture Research Institute Agriculture Research Center

Dr. Yehya M. Abd El-Fattah
Lecturer of Floriculture and Medicinal Plants Faculty of Agriculture
Suez Canal University

Horticulture Department
Faculty of Agriculture
Suez Canal University
2001
MICROPROPAGATION OF KHAYA SENEGALENSIS L. AND EUCALYPTUS CITRIODORA HOOK.

By

MOHAMMED ABD-EL-GAWAD EL-ATRIBY

(B.SC. AGRIC. MANSORA UNIVERSITY, 1996)

This Thesis for M.Sc. Degree has been

Approved by

Prof. Dr. / ….. Said ….. K. Kauzir ……..

Prof. Dr. / ….. Zaidouna Menesy ……..

Prof. Dr. / ….. Abdel Karim Wahy ……..

Date: 19 / 7 / 2001
Approval sheet

MICROPROPAGATION OF KHAYA SENEGALENSIS L. AND EUCALYPTUS CITR!ODORA HOOK.

By

MOHAMMED ABD-EL-GAWAD EL-ATRIBY

(B.SC. AGRIC. MANSORA UNIVERSITY, 1996)

This Thesis for M.Sc. Degree has been

Approved by

Prof. Dr./ Sharadsaw Menes

Prof. Dr./ Abdel Kawy

Prof. Dr./ Seid Sh. Loush

Date: 19/7/2001

3: Materials and methods

4- Results and discussion

4-1: Source of plant materials.

4-2 Multiplication stage

4-2-1: *Eucalyptus citriodora*

4-2-1-1: Experiment (1). The effect of media type, explant part and BA concentrations on number of shoots, length of shoots and number of formed leaves of *Eucalyptus citriodora*:

4-2-1-1-1: The main effect.

4-2-1-1-1-1: Effect of media type

4-2-1-1-1-2: Effect of explant part.

4-2-1-1-1-3: Effect of BA concentrations

4-2-1-1-2: The first order interaction.

4-2-1-1-2-1: Interaction between media type and explant Part.

4-2-1-1-2-2: The interaction between media type and BA concentration.

4-2-1-1-2-3: Interaction between explant part and BA concentration.

4-2-1-1-3: The second order interaction.

4-2-1-1-3-1: Interaction between media type, explant part and BA concentrations:

4-2-1-2: Experiment (2). The effect of media type, explant part and Kin concentration on number of shoots, length of shoots and number of formed leaves of *Eucalyptus*
citriodora:

4-2-1-2-1: The main effect.
4-2-1-2-1-1: Effect of media type:
4-2-1-2-1-2: Effect of explant part:
4-2-1-2-1-3: Effect of Kin Concentrations.
4-2-1-2-2: The first order interaction.
4-2-1-2-2-1: Interaction between media type and explant part:
4-2-1-2-2-2: Interaction between media type and Kin concentrations:
4-2-1-2-2-3: Interaction between explant part and Kin concentrations
4-2-1-2-3: The second order interaction.
4-2-1-2-3-1: Interaction between media type, explant part and Kin concentrations:
4-2-1-3: Experiment (3). The effect of media type, explant part and NAA concentrations on number of shoots, length of shoots and number of formed leaves of Eucalyptus citriodora.
4-2-1-3-1: The man effect.
4-2-1-3-1-1: Effect of media type:
4-2-1-3-1-2: Effect of explant part:
4-2-1-3-1-3: Effect of NAA:
4-2-1-3-2: The first order interaction.
4-2-1-3-2-1: Interaction between media type and explant parts:
4-2-1-3-2-2: Interaction between (media type, and NAA concentration) and (explant part and
NAA concentration)

4-2-1-3-3: The second order interaction. 89

4-2-1-3-3-1: Interaction between media type, explant parts and NAA. 89

4-2-2: Khaya senegalensis 93

4-2-2-1 Experiment. (1) The effect of media type, explant part and BA concentrations upon number of shoots, length of shoots and number of formed leaves of Khaya senegalensis. 93

4-2-2-1-1 The main effect. 92

4-2-2-1-1-1 Effect of media type 93

4-2-2-1-1-2 Effect of explant part: 94

4-2-2-1-1-3: Effect of Benzyl adenine concentrations. 95

4-2-2-1-2: The first order interaction 95

4-2-2-1-2-1: Interaction between media type and explant Part: 95

4-2-2-1-2-2: The interaction between media type and BA concentration. 98

4-2-2-1-2-3: Interaction between explant part and BA concentration. 98

4-2-2-1-3: The second order interaction. 99

4-2-2-1-3-1: Interaction between media type, explant part and BA concentrations. 99

4-2-2-2: Experiment (2): The effect of media type, explant part and Kin concentrations upon number of shoots, length of shoots and number of formed leaves of Khaya senegalensis. 109

4-2-2-2-1 The main effect. 109
4-2-2-2-1-1 Effect of media type 109
4-2-2-2-1-2 Effect of explant part: 112
4-2-2-2-1-3 Effect of Kin concentrations. 112
4-2-2-2-2: The first order interaction 112
4-2-2-2-2-1: Interaction between media type and explant Part: 112
4-2-2-2-2-2: The interaction between media type and Kin concentration. 113
4-2-2-2-2-3: Interaction between explant part and Kin concentration. 113
4-2-2-2-3: The second order interaction. 114
4-2-2-2-3-1: Interaction between media type, explant part and Kin concentrations. 114
4-2-2-3: Experiment (3): The effect of media type, explant part and NAA concentrations upon number of shoots, length of shoots and number of formed leaves of *Khaya senegalensis*. 123
4-2-2-3-1 The main effect. 123
4-2-2-3-1-1 Effect of media type 123
4-2-2-3-1-2 Effect of explant part: 123
4-2-2-3-1-3 Effect of NAA concentrations. 124
4-2-2-3-2: The first order interaction 124
4-2-2-3-2-1: Interaction between media type and explant Part: 124
4-2-2-3-2-2: The interaction between media type and NAA concentration. 129
4-2-2-3-2-3: Interaction between explant part and NAA concentration. 129
